## Returns

To arrange the return of any item, please call customer services on 01527 878348 within 48 hours of receiving your delivery. All goods must be returned in a saleable condition. Some items may be non-returnable or incur a re-stocking charge so please take detailed care that you are ordering what you require. Food products are non returnable.

## Carriage Terms

All orders within our Midlands catchment area are delivered free of charge; charges may apply to deliveries further afield. We do not have a minimum order value.

## Environmental Policies

We take our share of responsibility in caring for the environment. That's why many of the products in this catalogue are produced from recycled materials; look out for the familiar symbol. We source copy paper from sustainable sources. Even this catalogue is produced from FSC accredited paper!

## Terms and Conditions

We extend automatic credit accounts to local authority sponsored organisations. Terms of payment are 28 days following date of invoice. All prices are net and subject to VAT unless otherwise stated. Prices are correct at time of printing and are subject to change without notice. Goods are offered subject to availability and are supplied subject to our full terms and conditions, a copy of which is available on request.

## E Teflon Pouch Carriers

- The Lifejacket™ is designed to eliminate the risk of jamming or wrapping around the rollers which can be a problem when laminating smaller items in an oversized pouch
- Made of Teflon® which allows heat to completely penetrate through the pouch giving excellent lamination results every time and will work on most laminators
- Very long lasting and eliminates the need to continually buy standard card carriers

LPTCA4	A4	each	£13.64
LPTCA3	A3	each	£26.29

**RAZORBACK®**

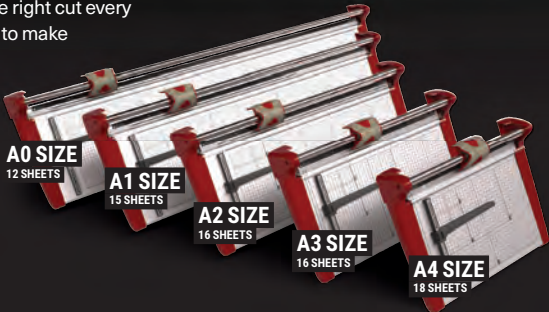

**DESIGNED TO  
ENDURE THE ROUGH  
AND TUMBLE OF A BUSY  
CLASSROOM**

With a reinforced base plate, hardened steel blade guide and impact resistant end caps, Razorback rotary trimmers stand up to the rigours of the classroom.

Thanks to the self-sharpening blade and sculpted cutting head with textured grip you will be able to effortlessly slice through material up to 1440gsm thick.

The solid steel base plate includes common paper size markings and gridlines to help you get the right cut every time. Use with the magnetic paper guide to make repeatable cuts faster.

Spare parts available for complete peace of mind and for heavier usage. This includes spare cutting heads, as even a Razorback blade can get worn with frequent use.

5 sizes available from A4 to A0, trimmer stand available separately.

## Paper & Card Thickness Guide

- Gsm = Grams per square metre - a measure of the weight of the paper and a general indication of its thickness and opacity.
- Microns = A specific measure of the thickness of the paper. 1 micron is 1/1000th of an inch.
- SHT or sheets is an old imperial measure of thickness.
- Due to the nature of paper manufacture, the conversion of weights to thickness is approximate and will vary between paper types and manufacturers.

## QUICK GUIDE | Rotary Floor Cleaning Machines

- Rotary floor machines come in different forms, for different tasks. Here's a quick guide on which type you need for various applications:
- Slow Speed Machines are typically 120-200rpm and are used for stripping polished floors, wet scrubbing floors and bonnet buffing carpets. The slow speed machine is an important machine in the cleaning teams armoury. You cannot wet scrub or strip floors with a high speed machine, it must be slow speed - a high speed machine will give a 'bow-wave' effect where the solution goes everywhere!
- High Speed Machines are typically 350-500rpm and are used for buffing, polishing and spray cleaning. If you have polished floors to maintain you cannot buff or polish with a slow speed machine.
- Twin Speed Machines are the best of both worlds - at the flick of the switch you can change between slow or high speeds. In effect this is two machines in one, making it very versatile.
- Ultra High Speed Machines are quite different and are generally well in excess of 1500rpm. The pads float on the floor, often with the weight of the machine taken by a set of wheels. These machines are used for buffing/polishing, spray cleaning and diamond polishing. These are easier to handle compared to the High Speed and need little skill. They will produce the highest gloss shine on a polished floor, however they are not that good at removing heavy scuff marks, the High Speed, with the extra weight on the floor, is better here.
- Orbital Machines work in a similar way to an orbital sander which means you can both polish and scrub with the same machine. These machines are generally very easy to handle.

## QUICK GUIDE | Melamine Floor Pads

Melamine sponges are made from exactly the same material as magic sponges. These are incredibly effective at removing marks and performing deep cleaning tasks with just plain water. To use the pads wet the pad, attach to the machine and use as normal with plenty of water through the machine (if you are using a scrubber drier, turn the solution control to maximum).

If you have a floor where conventional chemical and floor pads aren't cleaning the ingrained dirt, give these a try - they are great problem solvers. Light coloured safety flooring will come up brilliantly with these pads. Melamine pads can also be used to take polish off polished floors depending on the floor type.

Try the 6" pads on the Power Brush XL shown on page 358, it lifts ingrained dirt out of safety flooring in toilets exceptionally easily!

#### ASHLEY HEWITT

“From the very first phone call, through to our follow-up meeting and ongoing communications, Lynda demonstrated an impressive depth of knowledge in her field. She took the time to truly understand our requirements, ensuring that every recommendation was tailored to our specific needs.

What stood out the most was her genuine approach—she wasn't just focused on making a sale, but on finding the best possible solution for us. Her professionalism, attention to detail, and willingness to go the extra mile made the entire process smooth and stress-free. It was a pleasure working with her, and I wouldn't hesitate to recommend her expertise to others.”

# CASE STUDY

## Secondary School and Sixth Form Transformation

The school wanted a learning environment that sparks creativity and enhances the student experience. Forward Furniture brought this vision to life, refreshing study and social spaces with modern designs tailored to the students' needs. From consultation to installation, we handled every detail to make the process effortless. Collaborating with students ensured the final design met their expectations, creating spaces that inspire and energise.

← We designed and installed study areas with soft seating, too!

## Important Ordering Information!

To ensure your furniture ordering experience is as seamless as possible, please carefully read through the following important checklist...

### 01 Order early

Place your order as early as you can to avoid extended lead times during the summer months.

### 02 Check your order

Ensure you are ordering the correct dimensions and colours. Products are made to order so any returns or amendments after an order is confirmed may incur an extra charge. Sizes should also be checked to ensure that the correct size is ordered to suit the correct age group.

### 03 Contact details

Please supply contact name(s) and mobile phone numbers on all orders. This helps us book deliveries or to call the correct contact during school holidays.

### 04 Opening times

Please advise opening times if you are expecting a delivery within school holidays. These details will be used to install or deliver the goods on a convenient date.

### 05 Prepare for the delivery

Remember to keep hold of your old furniture until your new goods arrive, just in case any delays or issues occur. Ensure that there are staff available to receive the delivery as some courier policies are to deliver to the nearest undercover area so some items may need to be moved to the relevant part of the school.

### 06 Delivery

Some deliveries will be made by pallet via third party couriers within the pallet network and are curbside delivered. Please inform us before placing your order if this is an issue and we will discuss alternative transport options and any relevant costs. Please note, it is the customer's responsibility to remove or dispose of any packaging, including the wooden pallet itself.

### 07 Returns

Please note furniture is made to order and is therefore generally non-returnable if it has been supplied as per your order. Some suppliers may agree to collect and exchange an item but will usually charge a restocking fee. If it is necessary to return any furniture items then please contact our customer services team on 01527 878348 or email [sales@forwardproducts.co.uk](mailto:sales@forwardproducts.co.uk).

### Useful things to remember!

All classroom and office furniture is made to order so it is important to ensure that the correct size and type of furniture is ordered.

Delivery times fluctuate throughout the year with lead times being extended during peak months (June to September).

### Don't forget we offer FREE consultations!

Providing **expert recommendations** on layouts, furniture, fabric, and finishes - with 2D and 3D CAD drawings to help visual your spaces!

# Educational Furniture Height Guide

Selecting the correct table and chair heights is essential for student comfort and posture. This guide follows British and European Standards (BS EN 1729) to help you make the right choice.

## When choosing furniture we recommend you:

**Measure student heights** – Pupils’ heights can vary across year groups, so take measurements for accuracy.

**Check stature and popliteal height** – These key measurements (explained below) will help you match students to the correct furniture size.

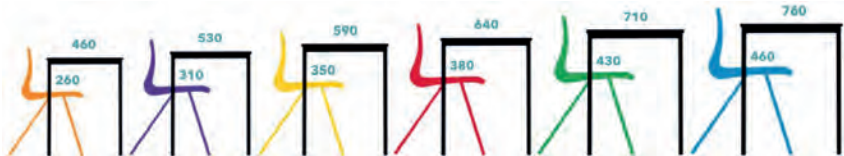

**Match with our height guide** – Use the diagrams below to find the right table and chair heights.

**Check existing furniture if replacing** – If you're matching new pieces to current furniture, measure their heights and specify them when ordering.

## Standing & Working Heights

Size Mark	Age Range	Popliteal Height Range	Stature Range	Table Height	Chair Height
1	Nursery (3-4 years)	250 - 280mm	930 - 1150mm	460mm	260mm
2	Primary (4-6 years)	280 - 315mm	1080 - 1210mm	530mm	310mm
3	Primary (6-8 years)	315 - 355mm	1190 - 1420mm	590mm	350mm
4	Primary (8-11 years)	355 - 405mm	1330 - 1590mm	640mm	380mm
5	Secondary (11-14 years)	405 - 435mm	1460 - 1765mm	710mm	430mm
6	Secondary/Adult (14+)	435 - 485mm	1590 - 1880mm	760mm	460mm

### Popliteal Height

Popliteal height defines the correct seat height. The measurement is taken from the floor to the back of the knee when seated, with thighs horizontal and lower leg vertical with feet flat to the floor.

### Stature

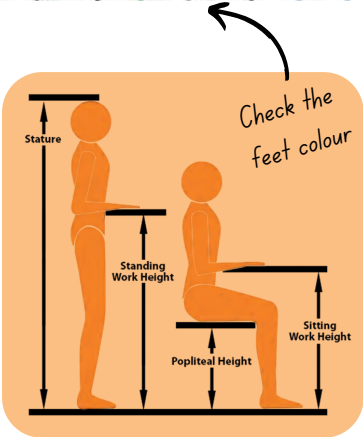

Stature is from floor to the top of the head.

### Sitting Work Height

Sitting work height defines the correct table height. The measurement is determined by sitting elbow height, which is the distance from the floor to the underside of the elbow whilst sitting with the upper arm vertical and the lower arm horizontal.

### Standing Work Height

Standing work height is determined by standing elbow height. The distance from the floor to the underside of the elbow with the upper arm vertical and lower arm horizontal.

The guides below show the measurements of each sizemark and age and stature ranges they are suitable for. This information is for guidance only. It is based on average pupil size across the EU. **Customers must ensure sizes are correct for their individual requirements**

Table/chair sizes may vary slightly from the sizes shown. The standard allows heights to be within a 10mm tolerance.

## Welded Frame Classroom Tray Tables

- The same quality tables as the preceding ranges, tray tables are fitted with runners and pull out trays providing individual storage for students
- Trays give extra scope for attractive colour schemes - see below for tray colour options
- Please check pupils will have sufficient leg room under tray tables; you may wish to move up a size
- **Please see Important Furniture Ordering Information on page 377 before placing your furniture order**

## Sienna Height Adjustable Desks

Sienna height adjustable desks are made in Europe with a minimalistic design and a reliable dual motor mechanism. Our three stage lifting column allows for an incredibly long stroke to cater for the smallest to the tallest user and with a 38mm per second movement you can get from sitting to standing in seconds.

- 2 stage single motor
- 628 - 1280mm height adjustment
- 5 year parts guarantee on electric components
- 10 years parts on wooden components
- Accepts standard screens with C clamp
- Only small pedestals will fit desk at lowest height
- High underdesk pedestals can fit providing desk is not lowered to lowest setting (or ideally programmed through software)

## Sienna Modular Storage System

Flexible working has introduced the need for spaces that encourage collaboration. The adaptive, modular design of the grid means that it can be reconfigured quickly and easily to suit the ever-changing needs of the office space. The basic building-blocks of the grid can be connected to create a framework entirely of your design, which can then be customised with accessories to enhance its functionality.

The Grid storage collection offers a customisation for each office space making it both functional and stylish. By combining alcoves, lockers, shelves and cupboard space Grid provides ample storage as well as creating a focal point for your office.

Grid provides the ideal solution for creating open spaces whilst still maintaining a degree of privacy. A wall of storage gives you a distinctive yet accessible space. Components are available in all of our wood and metalwork finishes.

Modular storage tailored to evolving office needs. Combines lockers, shelves & cupboards for versatility. Creates open spaces while maintaining privacy.

#### Carcass Colours

- All lockers come as standard with Activecoat anti-bacterial powder coating
- All plastic components used in the manufacturing incorporate a silver based anti-bacterial agent
- Activecoat developed in conjunction with Dupont

- Ergonomic Card Holder incorporating a lock cover which protects the lockers from key scratches

- Vent system allows each compartment to 'breathe'

- Even the standard lock has a micro sprung 10 lock featuring a massive 3000 serial combinator

- Every locker has a full strengthener welded into each door to increase security

- Between each compartment the locker has a welded plinth. This makes each compartment totally separate and increases structural rigidity

- High visibility key, making identification easy. Hasp and staple locks for padlocks are also available

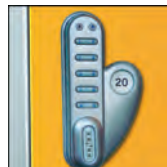

All lockers meet:

Lock options: Cam lock supplied as standard  
Combination Lock 3 Digit and Digital Combination Lock

Combination Lock 3 Digit

Digital Combination Lock

#### ACTIVECOAT

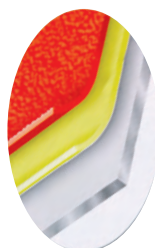

anti-bacterial technology

- The hard wearing anti-bacterial powder coating for the most stringent hygienic environment

#### Iron Phosphate Key Coat

This anti-rust, key coat bonds to the steel in readiness for the final active coating

- Prepared Steel Surface  
Chemical cleaning ensures an ideal surface for further coatings

## Lockers

**We love them! Endless possibilities...**

- The perfect way to hold staff/personal belongings in a safe and accessible way
- Wood finishes, bright colours, colour coded doors - there are endless opportunities
- Lockable or non-locking options
- Tall compartments for space efficiency or low ones that double up as worktop space

- Have you thought about lockers instead of pedestals?
- An excellent way to enable hot desking and at the same time save valuable space!

Bespoke Ash built in lockers

Low level lockers also act as a perfect work surface for a variety of activities.

## Important Ordering Information!

To ensure your furniture ordering experience is as seamless as possible, please carefully read through the following important checklist...

### 01 Order early

Place your order as early as you can to avoid extended lead times during the summer months.

### 02 Check your order

Ensure you are ordering the correct dimensions and colours. Products are made to order so any returns or amendments after an order is confirmed may incur an extra charge. Sizes should also be checked to ensure that the correct size is ordered to suit the correct age group.

### 03 Contact details

Please supply contact name(s) and mobile phone numbers on all orders. This helps us book deliveries or to call the correct contact during school holidays.

### 04 Opening times

Please advise opening times if you are expecting a delivery within school holidays. These details will be used to install or deliver the goods on a convenient date.

### 05 Prepare for the delivery

Remember to keep hold of your old furniture until your new goods arrive, just in case any delays or issues occur. Ensure that there are staff available to receive the delivery as some courier policies are to deliver to the nearest undercover area so some items may need to be moved to the relevant part of the school.

### 06 Delivery

Some deliveries will be made by pallet via third party couriers within the pallet network and are curbside delivered. Please inform us before placing your order if this is an issue and we will discuss alternative transport options and any relevant costs. Please note, it is the customer's responsibility to remove or dispose of any packaging, including the wooden pallet itself.

### 07 Returns

Please note furniture is made to order and is therefore generally non-returnable if it has been supplied as per your order. Some suppliers may agree to collect and exchange an item but will usually charge a restocking fee. If it is necessary to return any furniture items then please contact our customer services team on 01527 878348 or email [sales@forwardproduct.co.uk](mailto:sales@forwardproduct.co.uk).

### Useful things to remember!

All classroom and office furniture is made to order so it is important to ensure that the correct size and type of furniture is ordered.

Delivery times fluctuate throughout the year with lead times being extended during peak months (June to September).
